SANITARY WARE SPECIFICATION SHEET

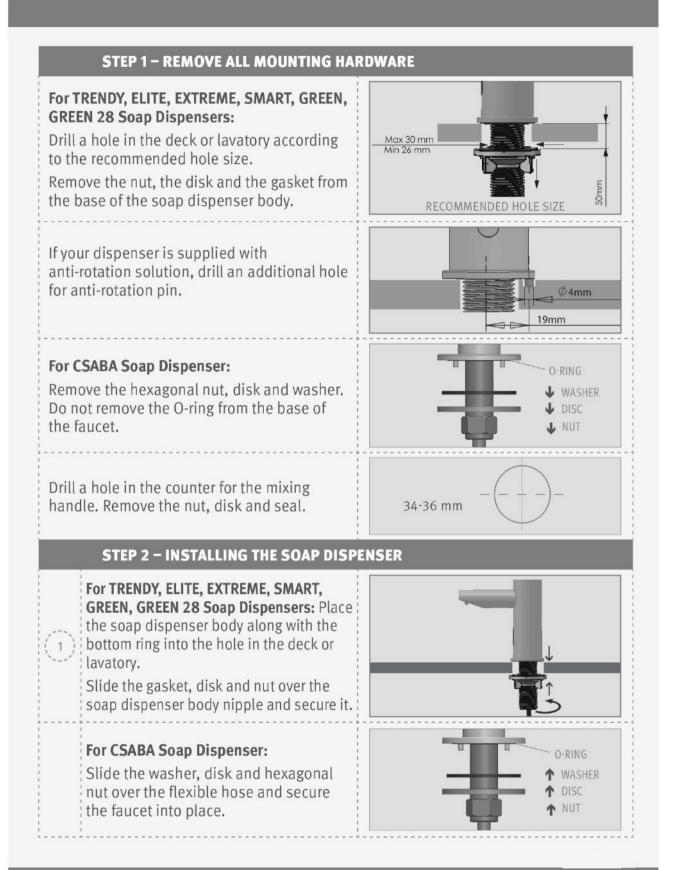

Item Descriptions	Stern (Israel) "Elite SD Plus AISI316" Stainless steel AISI316 extended body liquid soap dispenser with built-in sensor in DC Supply with 6D battery box	Illustration/ Drawing	
Model	Elite Soap Dispenser Plus B AISI316		
Code Number	236109		
Finish	Stainless Steel AISI316		
Supplier	Acme Sanitary Ware Co. Ltd Mr. Eric Wong/ Mr. Don Yuen		
Contact Tel/Fax	(852) 2388-7171 / (852) 2710-8012	(129	
E-mail	acme@acmesanitary.com.hk	T B	
Website	www.acmesanitary.com.hk		
Sensor. Stainless Steel AIS and bottle support. Optiona following functions can be Refill the soap tank, tempor *Versions for multifeed in Application: Closing automatically with the bathroom will stay orga creates a germ free and aut Use: Touch free electronic soap	dispenser for deck mounted installations. Activated by infrared 3316 body, other finishes available. Includes a 1 liter soap bottle al for remote installation: extension cable and longer piping. The performed by using Stern remote control: Soap quantity selection, orary off, coming back to factory settings. stallation available.		
Power supply	6D Alkaline battery*, plug-in transformer, output : 12 VDC 0.5A, or hardwired (1A/2.5A)		
Soap:	non-proprietary, viscosity up to 3800 cP for liquid soap. Up to 100 cP for foam	2000 june	
Tank capacity:	33.8 oz (1L) bottle or 203 oz (6L) Tank/Bracket		
Soap adjustability:	from 0.02 oz (0.7 ml) to 0.08 oz (2.3 ml)	Installation:	
Accessory	07100008 remote control for soap dispenser 07100009 remote control for foam dispenser	Lavatory Mounted	
Detection range:	+/- 4"	Power source: Battery box for 6xD batteries	
Dispenser hole diameter	1" ~ 1-1/8" (25~29 mm)		
Spare parts recommended:		Stern Soap & Water:	
07220279	10-pack sensor kit	Default soap dosage:	
07222013	soap dispenser pump (liquid soap version)	14 cc	
07222026	pump + compressor kit (foam soap version)	Soap viscosity:	
06522080	12 V transformer	100-3800 cPs	
*batteries are not supplied			

* All information of the above is for the reference only. No prior notice is made if any changes.

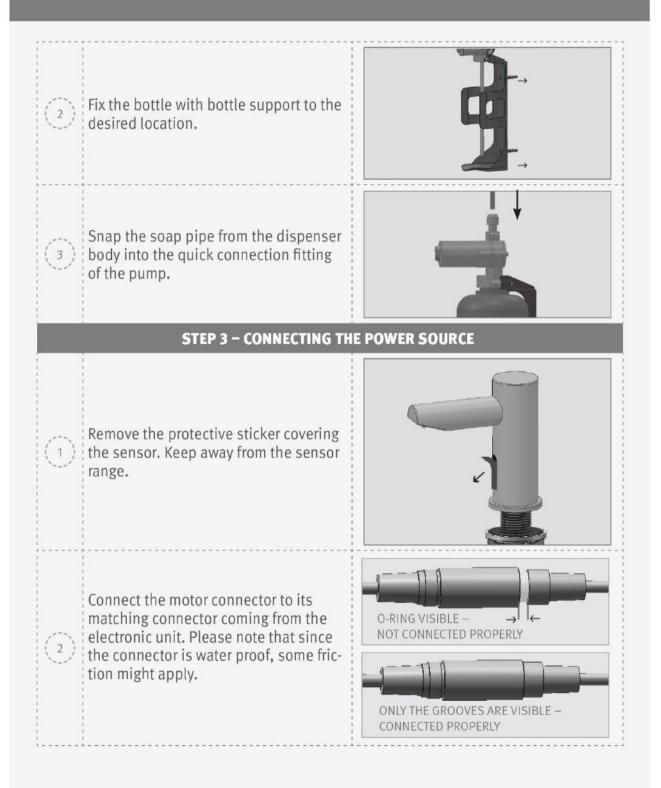

INSTALLATION

INSTALLATION

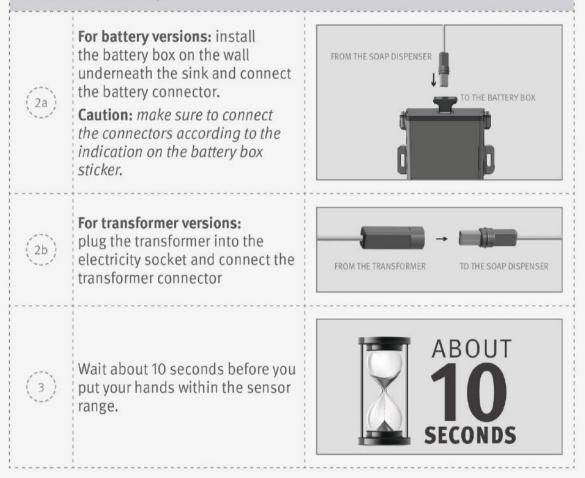

INSTALLATION

IMPORTANT: the 4 contacts connector should be connected properly so that the white o-ring is not visible and a clicking sound is heard.

PAY ATTENTION: If the 4 contacts connectors is not connected properly, the motor will work continuously.

TROUBLESHOOTING

Indication	Investigation	Cause	Solution	Illustration
False activation: Soap dispensing	Continuous discharge from the nozzle	AUX connector not fully inserted	The connector should be inserted fully until white o-ring is not visible. Remove the o-ring if necessary	O-RING VISIBLE -
	Random discharge from the nozzle	Reflection issue from other object	Eliminate any cause of reflection and if necessary use appropriate remote control to shorten detection range.	Min 1.5 M
	Soap discharging from pump housing.	Damaged pump due to high viscosity or debris in pipes	Replace the Pump. Rinse warm water through the pipe and the body of the soap dispenser all the way to the nozzle.	
Soap not dispensing	Pump is making sounds when sensor is activated	Soap tank is empty	Fill with soap with correct viscosity (100 - 3800 cPs) and prime pipes using the fill button on remote control.	Û
		Soap dispenser has not been primed	Prime the soap dispenser by pressing the fill button on the remote or by pressing the refill button located at the bottom of the pump, until soap exits the nozzle.	Press FILL Button
		Damaged pump (discharge from housing)	Replace the Pump	
		Debris or dried soap in the pipe or tank	Run warm water through pipe, pump, and body all the way to the nozzle. Replace with soap of correct viscosity.	
		High viscosity soap (> 3800 cPs)	NOTE: Using the soap dispenser with high viscosity soap may cause permanent damage to the pump and shorten the lifecycle.	Soap Viscosity (100 - 3800 cPs)
		Bent pipes	Unbend or straighten pipes.	

TROUBLESHOOTING

Indication	Invest	igation	Cause	Solution	Illustration
Soap not dispensing	Pump is not making sound when the sensor is activated	Pump is Sensor is not making blinking sound when when hand the sensor is is placed in	AUX connector not fully inserted	The connector should be inserted fully until the white o-ring is not visible. Remove the o-ring if necessary	O-RING VISIBLE
			Refill button on pump does not activate the pump.	Replace the Pump. Rinse warm water through the pipe and the body of the soap dispenser all the way to the nozzle.	Press
			Damaged pump (discharge from housing).		
			Debris or dried soap in the tank or tubing	Run warm water through pipe, pump, and body all the way to the nozzle. Replace with soap of correct viscosity. NOTE: Using the soap dispenser with high viscosity soap may cause permanent damage to the pump and shorten the lifecycle.	
		Sensor is not blinking when hand is placed in front	Refill button on pump does not activate the pump.	Transformer: Check operation with functioning transformer. Where necessary replace with appropriate transformer. For part numbers see spare parts list.	Refill
				Battery: Check operation with functioning battery pack. Where necessary, replace batteries or replace the battery pack: Battery pack (without batteries)	
			Reflection issue from other object	Eliminate any cause of reflection and use appropriate remote control to shorten detection range.	
			Damaged sensor	If the above two solutions have not resolved this issue replace with appropriate sensor. For part numbers see spare parts list.	Replace sensor
