SPARE PARTS LIST

Note: In order to locate the relevant spare part, please check the corresponding parts and part mumber in the drawing. Minimum order quantity will be required.

^{*} All information of the above is for the reference only. No prior notice is made if any changes.

INSTALLATION

Tubular Soap Dispenser E

Step 1 – Preparing for installation

1. Drill a hole (23 to 24 mm) at the desired location for the soap dispenser spout installation.

Drill a small hole (3.2 mm) just above the previous one for the anti-rotation pin, according to the diagram.

3. Remove the hexagonal nut and the disk from the base of the soap dispenser spout.

Step 2 - Installing the soap dispenser

- 1. Insert the Soap dispenser base.
- 2. Insert the anti-rotation pin into the small hole.
- 3. Fix the base behind the wall with the hexagonal nut and the disk.

4. Fix the bottle support to the desired location.

5. Assemble the tube from the pump to the soap dispenser.

INSTALLATION Tubular Soap Dispenser E Step 3 - Connecting the power source 1. Remove the protective sticker covering the sensor. Keep away from the sensor range and check that no objects are in front of the sensor. 2. a. Connect the motor connector to the power source connector. Please note that since the connector is water proof, some friction might apply. **Important:** the 4 contacts connector should be connected properly so that the white o-ring is not visible and a clicking sound is heard. Pay attention: If the 4 contacts connectors will not be connected properly, the motor will work continuously. Ť Connected properly so that only the groves are visible O-ring visible - not connected properly

b. For battery versions: install the battery box at the wall underneath the sink and connect the battery connector

c. For transformer versions: plug the transformer into the electricity socket and connect the transformer connector

c. ∰

3. Wait about 10 seconds before you put your hands within the sensor range.

TROUBLE SHOOTING
