自願參與用水效益標籤計劃 - 小便器用具
Voluntary Water Efficiency Labelling Scheme - Urinal Equipment

茲證明
This is to certify that

將下列小便器用具在本計劃內註冊：
has registered the following urinal equipment under this scheme:

牌 子 / Brand	:	Grohe
型 號 / Model	:	38.787.000 + 37.324.001
種 類 / Category	:	1
原產地 / Country or Region Origin	:	Germany

在用水效益標籤上展示的標誌 <i>Symbolic Presentation on the Water Efficiency Label</i>	:		滴水點 <i>Water droplet(s)</i>
用水效益級別 <i>Water Efficiency Grade</i>	:	1	
沖水量 <i>Water Flush Volume</i>	:	1.2	公升/循環 <i>litres/cycle</i>

簽發日期：
Date of Issue: 4 September 2020

4 February 2015

Dear Sir,

Approval of "GROHE" Urinal Sensor Flush Valves

Your letters ref. WRC/0937 to WRC/0940 all dated 5 January 2015 refer.

Having considered test reports ref. J17738A, J17738B, J17738D and J17738E all issued on 24 December 2014 by the Nutek Systems, Ltd., this Authority accepts that the fittings described below comply with, and their use when correctly installed does not contravene, the Waterworks Ordinance and Regulations.

Name of Manufacturer: Grohe AG

Country of Origin: Germany

Brand: Grohe

Details of Fittings: 1/2" Urinal flush valve concealed

Models: 37321SD1+37338000, 37321001+37338000,
37324SD1+38787000, 37324001+38787000

Proviso: As the fittings have not been tested for use in contact with water intended for human consumption, the fitting can only be used in flushing water plumbing system.

This Authority hereby permits the use of the above fittings in flushing water plumbing systems subject to full adherence to Waterworks installation requirements. In particular, you are required to draw your customers' attention to the following requirement-

"Installation of filters before flushing valves is required. Without the filters, the flushing valves are liable to leak. The installed filters need frequent inspection and cleaning to maintain flushing supply. Normally only public toilets with good management system for maintenance would be considered."

"A stop cock or gate valve must be installed at the upstream of the fitting for manual isolation of water supply."

"The design flushing volume of the flushing valves should be compatible with the toilet bowl to ensure that effective clearance can be achieved by a single flush of water."

"Flushing valves should be used within the range of working pressures specified by the manufacturer." AND

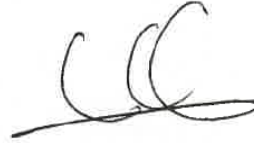

"Installation of electronic opening and closing sanitary tapware should also comply with the requirements of Electrical & Mechanical Services Department."

A condition of this acceptance is that the fittings to be installed shall be replicas of the samples as certified by the testing agent mentioned above and without modifications. This acceptance may be withdrawn at any time if the standard of the fittings installed fails to meet that of the approved samples or if the fittings are found to be unsuitable for use in flushing water plumbing systems.

For the use of the fittings in any project, the Acceptance Reference Number at the bottom of this letter must be quoted as a means of identification of acceptance of the fittings by this Authority.

Should you have any enquiries, please contact our Engineer Mr. Ken H
CHAN at tel. no. 2829 4453.

Yours faithfully,

A handwritten signature in black ink, consisting of three stylized, overlapping loops followed by a horizontal line.
