Approval of "GROHE" Sensor Flush Valves

Your letters ref. WRC/1146 dated 13 June 2016 and C-WSD/0210 dated 16 June 2016 refer.

It is noted that the fittings described below have been accepted by the United Kingdom Water Regulations Advisory Scheme (WRAS) to have complied with the requirements of the United Kingdom Water Supply (Water Fittings) Regulations / Scottish Water Byelaws when correctly installed.

Name of Manufacturer: Grohe AG

Country of Origin: Germany

Brand: Grohe

Details of Fittings: Range of urinal flush valves and operating members, with brass bodies and EPDM rubber seals. The valves are actuated either via a solenoid valve and infra-red sensor. Maximum working pressure 10.0 bar. For cold water use only.

Model: 37.338.000 + 37.321.001 / 37.321.SD1 / 37.336.001

Size: ½" BSP male inlet and outlet, or ½" BSP female inlet x ½" BSP male outlet.

Marking: Grohe on operating members

WRAS Approval Number: 1604023

Installation Requirements: R001, R075, R120

Expiry Date: 30 April 2021

In view of the acceptance by WRAS, this Authority has no objection to the use of the said fittings in flushing water supply plumbing systems subject to full adherence to Waterworks installation requirements. In particular, you are required to draw your customers' attention to the following requirements –

“Installation shall comply with the ‘Installation Requirements & Notes’ of the WRAS’s approval letter concerned.”

“Installation of filter before flushing valve is required. Without the filter, the flushing valve is liable to leak. The installed filter need frequent inspection and cleaning to maintain flushing supply. Normally only public toilets with good management system for maintenance would be considered.”

“A stop cock or gate valve must be installed at the upstream of the fitting for manual isolation of water supply.”

“The design flushing volume of the flushing valve should be compatible with the toilet bowl to ensure that effective clearance can be achieved by a single flush of water.”

“Flushing valve should be used within the range of working pressures specified by the manufacturer.” AND

“Installation of electronic opening and closing sanitary tapware should also comply with the requirements of Electrical & Mechanical Services Department.”

A condition of this acceptance is that the fittings to be installed should be replicas of the sample certified by WRAS and no modification should be made to the fittings. This acceptance may be withdrawn at any time if the standard of the fittings installed fails to meet that of the approved sample or if the fittings are found to be unsuitable for use in flushing water supply plumbing systems.

For the use of the fittings in any project, the Acceptance Reference Number at the bottom of this letter must be quoted as a means of identification of acceptance of the fittings by this Authority.

Should you have any enquiries, please contact our Engineer Mr Terry KUNG at tel. no. 2294 2656.

Yours faithfully,

(LAM Ching Man)
for Water Authority
