Height	73mm, beneath the basin 223mm									
Spout length	120mm									
Volume	0.5-litre tank									
Finish	Chrome-plated brass body and push-button									

Note:

* All information of the above is for the reference only. No prior notice is made if any changes.

REFILLING (fig. D)

- From the top by removing the dispenser head ⑤.
- Into the reservoir by unscrewing it from the dispenser ⑥.

FEATURES

EN

- Pump-action liquid soap dispenser (the mechanism operates by suction).
- The pump mechanism can be removed for maintenance or for refilling. The upper part can be locked in place by a grub screw using a 3 mm Allen key, which is supplied in a separate bag.

INSTALLATION (fig. C)

- Fit the tube over the mechanism's nozzle ①.
- Slide the tube and mechanism into the sheath ②.
- Insert the screw ③ and then tighten the bottle underneath ④.

INSTALLATION

- **ATTENTION: Do not use soapy water, detergents and acidic soaps with a pH less than 6.**
- Only use liquid soaps.
- Press the push-button slowly several times to evacuate the air out of the tube.
- To avoid a long priming time for references 729150, 729112 & 729108, position the 5L soap reservoir at a maximum distance of 600mm from the dispenser on a dedicated shelf (fig. A).

NB: The non-return valve should not touch the bottom of the tank.

Note: To avoid priming the dispenser after every refill, top-up the soap in the reservoir before it is completely empty.

MAINTENANCE & CLEANING

Cleaning chrome: do not use abrasive, chlorine or any other acid-based cleaning products. Clean with mild soapy water using a cloth or a sponge.

Clean the pump with hot water.
