CP Plastic Resealing Adjustable Inlet Bottle Trap 75mm Water Seal Chrome Plated Plastic Resealing Adjustable Inlet Bottle Trap with Multifit Outlet <ul style="list-style-type: none"> ● Available in 1 1/4" and 1 1/2" sizes ● 75mm Water Seal ● Multifit Compression Outlet suits all plastic, copper and lead pipe ● Adjustable Inlet makes trap suitable for all domestic repair, maintenance and improvement work ● The simple non-mechanical action ensures retention of, adequate water seal even under extreme syphonic conditions ● Eliminates the need for secondary ventilation ● Chrome Plated Plastic General Resealing Bottle Traps are an alternative to Anti-Syphon Traps (Silenttraps) and may be used in similar circumstances Operation When the Trap is subject to syphonic conditions the automatic hydraulic action allows air to be drawn through the inlet of the Trap and through the by pass columns thus breaking the syphonic action. On cessation of syphonic conditions the remaining water falls back to reseal the Trap. The Silenttrap ventilates by drawing air through a Non-Return Valve whereas the Resealing Trap ventilates by drawing air through the inlet of the Trap and through the water seal Advantages The simple non-mechanical action ensures retention of, adequate water seal even under extreme syphonic conditions Eliminates the need for secondary ventilation
