Mediclinics: 50 years of evolution, innovation and commitment

Mediclinics was founded in 1974. Eleven years later, in 1985, we began manufacturing what would become one of our most iconic products: the Saniflow® E-85. Its success was no coincidence. Like any project built to last, our journey has been shaped by time, continuous learning, and a firm commitment to doing things the right way.

Beyond technology and design, our products form part of the daily experience of millions of people. They are present in public and professional spaces where comfort, hygiene, and ease of use truly matter. Every Mediclinics solution is created to deliver an intuitive, efficient, and pleasant user experience, helping to shape environments that are comfortable, functional, and thoughtfully maintained.

Over the years, Mediclinics has evolved into an international benchmark in hand dryers and public washroom equipment. This has been achieved through specialisation, technical reliability, efficiency, and a functional, timeless design that integrates seamlessly into even the most demanding spaces. Today, architects, engineers, designers, and specifiers around the world place their trust in our solutions, recognising that the true value of a public washroom lies not only in its appearance, but also in its durability, energy efficiency, regulatory compliance, and ease of maintenance over time.

After 50 years, we continue to move forward with the same philosophy: to innovate with purpose, collaborate with internationally recognised laboratories and certification bodies, and develop products that respond to the real needs of present and future projects. New challenges inspire us to keep improving, exploring new solutions, and strengthening our unwavering commitment to quality and excellence.

I would like to sincerely thank our customers, partners, specifiers, and the entire Mediclinics team for the trust you have placed in us throughout these years. Thanks to your dedication, high standards, and shared vision, today we celebrate half a century of history and look to the future with the same enthusiasm and a firm commitment to continue delivering reliable, efficient, and long-lasting solutions.

Jaime Visa,
General Manager
of Mediclinics SA

Since 1974,

we have been providing solutions in design, efficiency and innovation for public washroom equipment.

OUR MISSION

is to equip public washrooms with high-quality solutions.

We know that these spaces, often underestimated in public environments, deserve special attention. That is why we focus on design, efficiency and safety. We incorporate state-of-the-art technology to transform the user experience and raise the standards of public washrooms.

OUR VISION

We aim to be the first choice worldwide in public washroom equipment, recognized for our quality, design and innovation. We aspire to transform unique spaces, in order to meet the expectations of the most demanding users, and always staying at the forefront of technology, reliability and sustainability.

OUR VALUES

are rooted in the trust our customers have placed in us over these 50 years. This trust has been built thanks to our firm commitment to quality, efficiency and innovation, as well as a team dedicated to providing attentive and personalized customer service.

INNOVATION AS A CENTRAL PILLAR

When designing a new product, we pay attention to every detail to offer innovative solutions that add value to the toilet space. That is why we focus on creating products that are environmentally friendly, deliver high performance and also stand out for their aesthetics.

RESEARCH AND DEVELOPMENT

We have our own R&D&I department, made up of a highly qualified engineering team, who design and develop new solutions. We also have a testing laboratory that assesses every innovation to ensure it meets the most demanding quality standards.

IN-HOUSE PRODUCTION

Our facilities are equipped with flexible, modern and highly efficient production lines, operated by skilled staff who receive ongoing training and are responsible for manufacturing our products to our quality standards.

COMMITMENT TO OUR CUSTOMERS

Customer satisfaction is one of our main priorities. That is why we have a specialized, professional and proactive sales and service team that is ready to provide effective solutions to all your needs.

LOGISTICS CAPACITY

With over 6,000 m², our central warehouse is equipped with modern handling and storage systems, enabling us to guarantee swift and efficient order preparation, packing and dispatch processes.

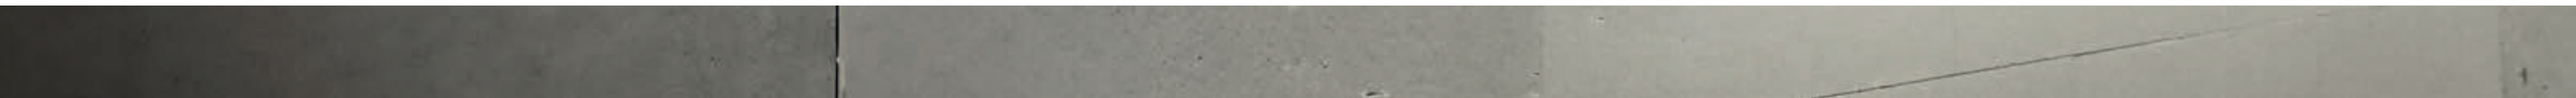

QUALITY, OUR FUNDAMENTAL PILLAR

Our Quality Management department, made up of highly qualified and expert professionals, ensures that our products meet the most demanding quality standards, guaranteeing their durability and efficiency. In addition, all our processes are certified in accordance with the international standard EN ISO 9001.

CERTIFICATION AND SAFETY

Our products comply with the strict safety and quality standards required by the market. To guarantee this, we have certification and verification from renowned external laboratories, such as VDE (Verband der Elektrotechnik und Elektronik), TÜV Rheinland and UL (Underwriters Laboratories).

Rooted in these principles, we move forward on our journey toward excellence, as we have for the past five decades. With our eyes on the future and our commitment firmly anchored in the present, we strive to inspire professionals in search of innovative, high-quality design solutions for their projects.

Hand dryers

We have specialized in the design, development and manufacture of high-performance hand dryers for public washrooms **since 1974**, offering innovative solutions tailored to the **highest demands.**

Our wide range of hand dryers is synonymous with **quality and efficiency.** Made from **durable materials and featuring cutting-edge technology**, they provide **effective and hygienic drying.** Thanks to the extensive variety of models, different solutions can be easily integrated into any space, from high-traffic areas to smaller spaces.

All our hand dryers are certified, ensuring high reliability throughout their service life.

Speedflow® Plus – ref. M17AB

Eco-fast range

The fastest drying with the lowest energy consumption

Hand dryers with **cutting-edge design and state-of-the-art technology** offer exceptional functionality, hygiene and safety. They feature a HEPA filter and, depending on the model, Ion Hygienic® technology and Biocote® antimicrobial additive, making them **the most hygienic on the market.** They also have **low energy consumption**, enabling efficient drying with minimal environmental and noise impact. Ideal for high-traffic areas seeking to **stand out in design, sustainability and efficiency.**

Behind the mirror solutions

Elegant hand hygiene system concealed behind the mirror that **enhances the user experience and elevates the aesthetics of the space.** Ideal for high-traffic areas, it facilitates hand washing and drying **without the need to move around** the toilet space, thus reducing usage time and water splashes on the floor.

This innovative system can include **a water tap, automatic soap dispenser, hand dryer or paper dispenser,** all designed to offer an intuitive, efficient and contactless cleaning experience.

BTM solutions **optimise energy consumption,** thanks to sensor activation and the use of an eco-fast dryer. It also features a locking system and **anti-vandal** protection, making it a secure solution.

Three-accessory cabinet - ref. BTM02

BtM

Solutions that enhance the architecture of the environment

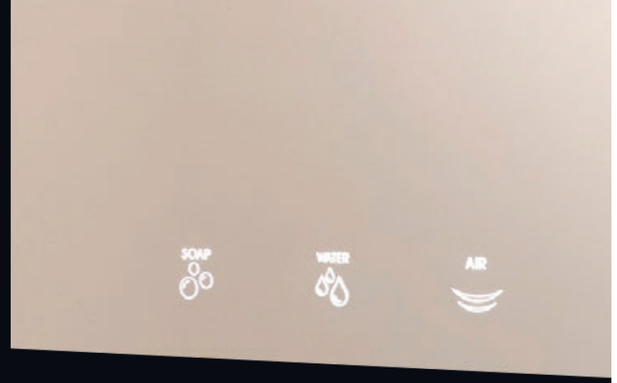

Maximize the **functionality and aesthetics of the space** with the hygiene system concealed behind the mirror. Choose the option that best suits your space, with **complete cabinets** of 2 or 3 accessories, or **individual accessories** for a free installation.

BEHIND THE MIRROR SOLUTIONS

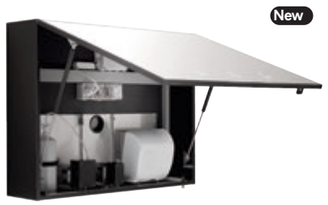

mediclinics

BtM

Hand washing and drying cabinet with 3 accessories, mirror and lock

The three-accessory cabinet includes a **soap dispenser, water dispenser and an air or paper drying system**, thus providing a comprehensive disinfection solution at a single point. It also offers an intuitive, fast and contactless hygiene experience.

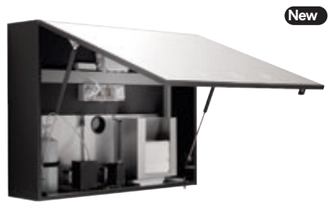

BTM02*
Complete cabinet with soap, water and air drying

MATERIAL: **MDF wood and glass**

Wash and dry units

The All-In-One washing and drying units are an elegant and exclusive hand washing and drying system integrated into the washbasin or wall, providing an **elegant and efficient solution** for demanding public toilet facilities.

They consist of a **soap dispenser, water tap and hand dryer,** all sensor-activated to offer convenient, hygienic use and resource savings. In addition, the air dryer unit promotes **energy savings** thanks to its high-speed, low-consumption motor.

With options available for installation in the washbasin itself or for wall mounting, the mechanisms remain concealed to provide **greater discretion and a better user experience.**

all-in-one

Wall-mounted model

Intuitive and easy to use
without moving around

The three-piece wall-mounted All-In-One set is designed to integrate elegantly into the toilet facility. Comprising a **water tap, soap dispenser and hand dryer,** it ensures maximum hygiene without the need to move around. This prevents water splashes on the floor and promotes a safe environment.

Baby changing stations

Mediclinics redefines the concept of changing stations by merging **design, robustness, technology and hygiene.**

Designed to offer maximum comfort and safety for babies, this changing station is available in a variety of finishes and installation options, making it ideal for public spaces seeking a **clean, functional and aesthetically-pleasing solution.**

Thanks to the Biocote® additive and Ion Hygienic® technology, Babymedi® guarantees superior and long-lasting hygienic protection.

babymedi®

Maximum hygiene, safety and integration

DESIGN AWARD 2026

reddot winner 2026

EUROPEAN PRODUCT DESIGN AWARD

The Babymedi® changing station range stands out for its innovative and elegant design. It is available in **horizontal and vertical formats,** with options for **surface-mounted or recessed installation,** making it easy to integrate into any space.

WATCH VIDEO

vertical Babymedi® – ref. CP0016VPVDC

The most hygienic changing station on the market thanks to Biocote® antimicrobial protection and Ion Hygienic® technology

Biocote®
Antimicrobial additive

Improved hygiene
Inhibits the reproduction of harmful microorganisms.

Greater cleanliness
Protects surfaces against mould, unpleasant odours and stains.

Odourless
The additive is odorless, making it safe for babies.

Biocote® antimicrobial protection prevents germs from proliferating, although the surface must still be cleaned regularly to remove these germs.

Ion Hygienic®
Bacteria neutralizer

Effectiveness of the ionizer tested by: TÜVRheinland®

Improved hygiene
Purifies the air by eliminating germs and bacteria.

Clean technology
Operates by electrostatic attraction of particles.

Safe
No electrical risk as it is battery operated.

When the changing station is closed after use, the ionizer is activated, disinfecting its surface.

babymedi®

1. **PRACTICAL**
Sanitary liner dispenser with safety lock.
2. **ROBUST**
Certified to support heavy static loads.
3. **ANTI-MICROBIAL PROTECTION**
Surface coated with Biocote®.
4. **FUNCTIONAL**
Hook for hanging personal items.
5. **ELEGANT**
Smooth, rounded curve design.
6. **SAFE**
Includes safety belt.
7. **AIR PURIFICATION**
Optional: Ion Hygienic® technology.

Maximum permitted load of 20 kg.

Soap dispensers

Designed to suit any environment and need, our range of soap dispensers offers a wide variety of models, available with **either automatic or manual operation,** and suitable for **surface-mounted or recessed installation.**

Depending on the model, they can dispense liquid, foam or spray soap, and offer the flexibility to use different types of soap with the same unit, optimising consumption and encouraging savings.

All models are **equipped with a front window** for quick soap level monitoring, making maintenance easier, and with a **security lock with key,** protecting the contents against possible vandalism.

Manufactured from highly resistant materials, these dispensers are available in high-capacity versions, ideal for **high-traffic areas** such as airports, hospitals and gyms, as well as in **more compact formats** for lower-traffic environments such as hotels, restaurants and care homes.

Automatic soap dispenser - ref. DJ0037AB

DJ0037A

Elegance and versatility

Automatic operation

With automatic operation to **avoid contact and prevent the spread of germs,** this soap dispenser combines maximum **elegance and efficiency.** Its versatile design allows it to accommodate three different types of soap (liquid, foam, or spray) when the corresponding accessory is ordered separately.

Toilet paper dispensers

Mediclinics offers a wide range of toilet roll dispensers made from high-quality materials that provide **reliability, robustness and long-term use,** especially in high-traffic areas.

Their **large capacity, durability and functionality** make them an ideal solution for public toilet facilities. They are **compatible with toilet rolls of various diameters and core sizes,** providing great **versatility of use.** In addition, they feature advanced **anti-vandal security systems** and **paper braking mechanisms,** which optimise consumption, reduce environmental impact and contribute to long-term operational savings.

Thanks to their elegant and easily integrable design, these dispensers fit seamlessly into any space, seeking to combine **hygiene, efficiency and aesthetics** in a single product.

Toilet paper dispenser - ref. PR2783B

PR2783

High capacity and durability

Jumbo roll dispensers

Designed for demanding environments, this dispenser is built to perform at its best in **high-traffic areas.** Its **large capacity, durability and functionality** make it a **long-lasting, efficient and reliable solution.** Made of **AISI 304 stainless steel**, it features a front viewing window for content monitoring and an anti-vandal lock for added security.

Waste bins and other containers

Bins with a functional design for **quick and easy maintenance**. They stand out for their versatility and durability, making daily waste management easier. Available in **free-standing, wall-mounted or recessed versions**.

Made from durable, high-quality materials, they suit all types of environments and needs, with capacities **ranging from 3 litres** — ideal for small spaces — **to 80 litres**, designed for high-traffic areas.

With clean, minimalist lines, these bins not only offer a practical solution for waste collection, but also **integrate elegantly** into any public toilet facility setting. They are the perfect choice for offices, receptions, sports facilities, shops, airports and shopping centres.

Bathroom accessories

Mediclinics offers an extensive range of bathroom accessories for public spaces, notable for their **durable materials and variety of finishes**. Each line includes a carefully selected range of towel rails, soap dishes, shelves, toilet roll holders, toilet brush sets and robe hooks, among others, offering great versatility and functionality. Designed to integrate easily into any setting and **meet all kinds of needs**.

AURA series

Rounded lines
and pleasant to the touch

The accessories in the AURA series stand out for their **smooth, rounded finishes.** Available in bright, satin finish or black AISI 304 stainless steel, they blend perfectly into any environment, providing a **sense of comfort** to daily routines.

Grab bars and other mobility aids

Mediclinics, in collaboration with Goman – a leading Italian manufacturer of safe bathroom and sanitary accessories – offers a comprehensive range of products designed to **improve the autonomy and safety of people with reduced mobility** in the bathroom environment. This includes grab bars, shower seats, adapted toilets, accessible baths, ergonomic washbasins and tilting mirrors, all developed with high-quality materials and designed for ease of daily use.

All products are manufactured in accordance with SUA (Safety of Use and Accessibility) regulations, ensuring **spaces that are fully accessible, safe and inclusive.**

Grab bars

Designed to meet **strict quality standards,** Mediclinics grab bars guarantee safe, reliable and long-lasting use, **making movement within the toilet easier and helping to prevent falls.**

Organised into different series, they are available in a wide **variety of designs, materials and finishes,** enabling them to be adapted to different architectural styles and functional requirements. They are intended for both public toilet facilities and individual installations **in residential rooms, hospitals or hotels.**

MEDIEPOXI series

Minimalism and contemporary design

The Mediepoxi series features a carefully selected range of grab bars designed with rounded, elegant lines. Available in white or black finishes, they integrate perfectly into modern bathrooms, providing safety without compromising on contemporary style.

Other mobility aids

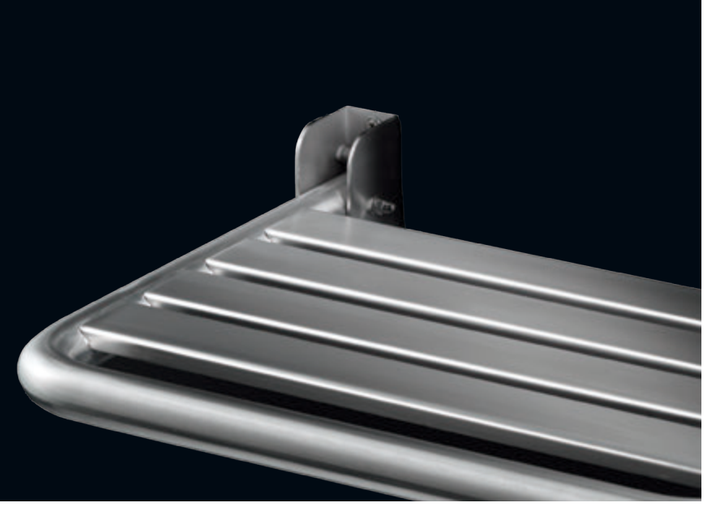

Our range of equipment to improve public washroom accessibility has been designed to transform the space into one that is truly **accessible, safe and aesthetically integrated.** Each product has been carefully selected to meet the real needs of the user, combining functionality with elegance.

Ergonomic shower seats and fixed or tilting mirrors, designed to create inclusive environments that prioritise comfort and autonomy without compromising on design.

Made with high-quality, durable materials, these solutions guarantee strength and easy maintenance. Equipment that meets the highest standards, for spaces where inclusion is synonymous with excellence.

Shower seats

Comfort and versatility

The shower seat collection offers a wide variety of models made from high-quality materials and available in multiple finishes and colours, designed to blend harmoniously with any bathroom style.

These seats guarantee a safe, comfortable and long-lasting experience. Their strength, ergonomics and ease of installation make them the ideal solution for both private spaces and hotels, or for public environments that prioritize accessibility without compromising on design.

Stainless steel sanitary ware

Mediclinics presents a range of sanitary ware made from **AISI 304 stainless steel**, featuring a robust and modern design, especially intended for environments that require **anti-vandal, functional and durable equipment.**

This line includes toilets, urinals, washbasins, squat toilets and shower trays, making it the ideal solution for installations in schools, prisons, stadiums, venues and nightclubs.

Thanks to the strength and properties of their materials, these products require **minimal maintenance**, resulting in a significant reduction in operating costs.

mediclinics

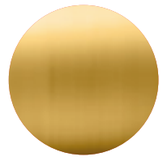

Optional coatings

PVD

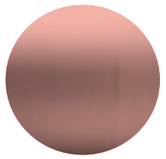

PVD (Physical Vapour Deposition) is an advanced coating technique that provides a high-quality finish, great durability and a superior aesthetic appearance. Mediclinics offers this coating as an option on the products previously indicated in the catalogue, with the aim of adding an extra touch of elegance and exclusivity to the washroom space.

Sophistication	Resistance	Sustainability
Its metallic finish gives a luxurious and sophisticated appearance. In addition, its excellent colour stability ensures a lasting shine over time.	It offers greater resistance to wear, abrasion and corrosion, extending its service life and guaranteeing a superior quality finish.	It is environmentally friendly because it does not contain harmful chemicals or generate hazardous waste.

Available colors:

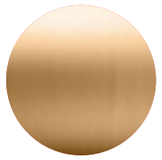

GOLD

COPPER

ANTHRACITE

BRONZE

*APPROXIMATE COLOURS, SUBJECT TO PRINTING PROCESS.

Cleaning specifications

Stainless steel

General instructions

01. Before applying any treatment, completely remove the plastic protection from the stainless steel.

02. Do not use rough cloths, paper cloths or scouring pads.

03. Dry the treated surface using a gentle cloth.

04. As a general rule, use only a gentle cloth dampened with soapy water.

05. The application of certain cleaning treatments may change the shade of a part's finish; therefore, treatment of the entire part may be necessary.

06. Never use bleach, products based on hypochlorite solutions, liquids made with strong acids often used for cleaning floors and walls, hydrochloric acid or products containing petrol in the cleaning process.

07. Pay special attention to the components of cleaning products, especially those specifically for cleaning bathrooms.

08. In exceptional cases, carefully polish very specific areas. Then use a gentle cloth dampened with soapy water and dry thoroughly.

09. Printed marks are easily removed when these cleaning processes are applied. Therefore, where possible, avoid applying on top of logos or other printed marks.

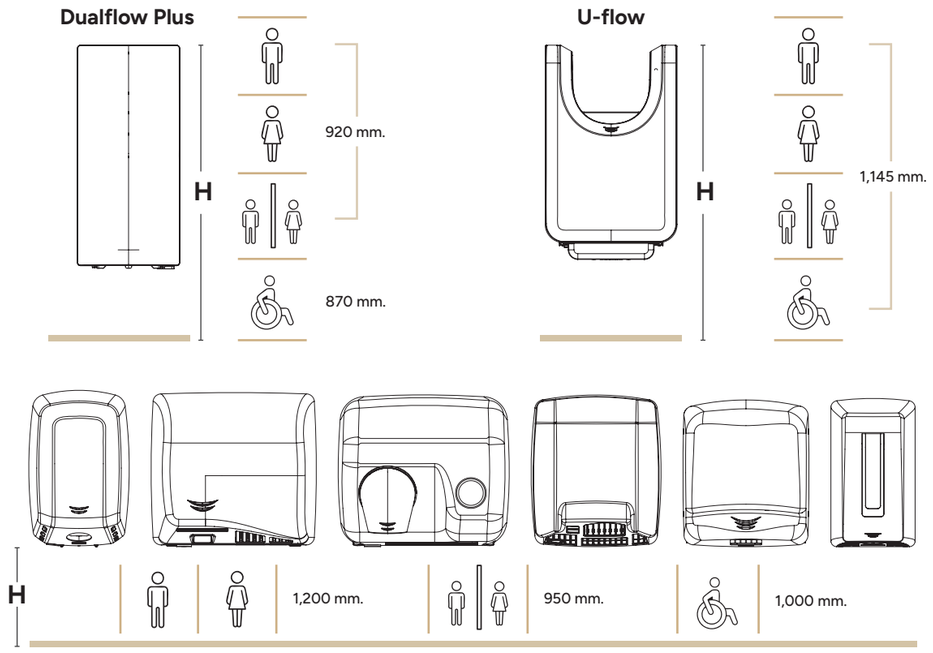

Cleaning specifications

	WITH WHAT?	HOW?
REGULAR CLEANING	Liquid soap or neutral household detergent. Water.	Clean with a soft chamois cloth or sponge and warm water. Remove any moisture with a dry cloth. If the product is subjected to hostile environments, such as salt (near the sea), intense humidity, chlorine (swimming pools), etc., a further treatment in addition to regular cleaning is recommended, which involves the application of a household product containing silicon.
MEDIUM DIRT LEVEL (stains, fingerprints...)	Liquid soap or neutral household detergent. Water. Cream or liquid polish for metals, specific for steel, such as the one manufactured by 3M.	Proceed in the same way as for regular cleaning. If you use specific household products, follow the manufacturer's instructions. Ensure that the products are liquid or cream. If using sprays, apply the product to the cloth, not directly onto the surface to be treated.
HEAVY DIRT LEVEL (discolouration due to atmospheric agents)	If the above procedures do not provide satisfactory results, carefully use household cleaners, degreasers or solvents. Never use products specifically designed for tin or copper as they may affect the colour of the steel. The 3M product recommended above may be useful in these cases.	Proceed in the same way as for regular cleaning. If you use specific household products, follow the manufacturer's instructions. Ensure that the products are liquid or cream. Before treating the entire affected surface, carry out a test on a small area.
MINERAL DEPOSITS – LIMESCALE	Dilute 5% white vinegar in water. Specific cleaning products for lime with a silicone protective base, for example, "Super brillo Oro" (with acetic or phosphoric acid).	Proceed in the same way as with regular cleaning. In the case of using specific cleaning products, follow the manufacturer's instructions. Before treating the entire affected surface, carry out a test on a small area.
RUST MARKS	Any of the above, excluding those indicated for highly resistant stains. You can use 3M Scotch-Brite specially designed for scratch-free cleaning of ceramic cooktops.	Gently and carefully polish using 3M Scotch-Brite in the direction of the grain or lines. NOTE: This method only applies to satin finishes, never to bright finishes.

3. FLAT62/01 washbasin with tap

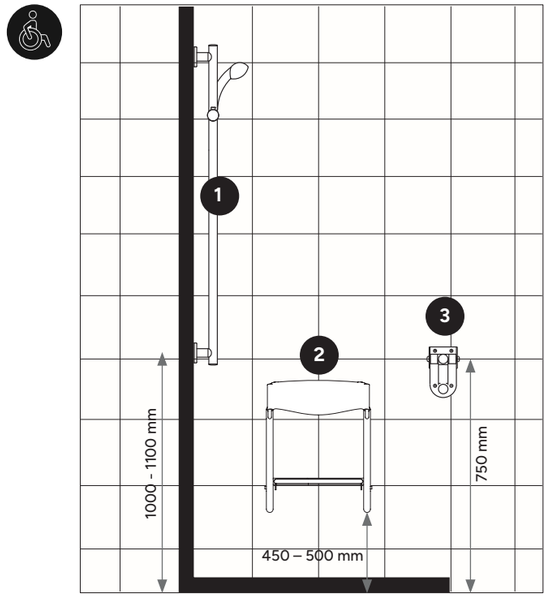

1. Grab bar BG0800C-CS
2. Toilet paper dispenser PR2784-B-C-CS
3. Wall-hung toilet D0182/01
4. Tank flush button
5. Toilet brush set ES0010C
6. Grab bar BR0750C

WASHBASIN AREA

1. Saniflow automatic hand dryer
2. Grab bar SH-B60/31
3. Mirror D0042/99
4. D0280/01 washbasin with tap
5. Liquid soap dispenser DJ0037A-B-C-CS
6. Grab bar SH-B60/31

SHOWER AREA

1. Shower rail LEX-X030/37
2. Folding shower seat with backrest X835/01
3. Support bar LEX-B60/37

Certifications

GS / UL

- Guarantees that the stated technical specifications (voltage, power, consumption, etc.) are met.
- Guarantees that the user can never get access to the live parts of the appliance.
- Guarantees that the equipment will never experience abnormal temperature increases.
- Guarantees that the user will never receive an electric shock when touching accessible metal parts.
- Guarantees that our hand dryers are protected against transient surges.
- Ensures that our machines are resistant to the ingress of water and solid objects.
- Guarantees the minimum fire risk for all our equipment.
- Guarantees that the covers of our hand dryers can withstand impact energy of 0.5 J.

EMC

- Guarantees that our appliances will not have any negative effects or cause collateral damage to other electrical or electronic devices in the vicinity by the emission of continuous or discontinuous disturbances.
- Guarantees that our units function properly without being affected by other devices in the environment, whether radiated or conducted through the mains electricity.
- Guarantees that our appliances function properly without generating radiated or conducted interference that may affect the operation of other devices in the vicinity.

GBCE

The "Green Building Council España" concept has emerged from the need to develop standards for energy efficiency and environmental responsibility. It focuses mostly on resources such as energy, water and materials. Its main objective is to achieve maximum efficiency from these resources.

- It ensures equipment is energy-efficient and environmentally friendly.
- It reduces energy bills as well as the negative impact on the environment.
- It helps in the design and construction of healthier and more productive buildings and spaces for people.
- It enhances the energy efficiency of any type of building.

ISO 9001

- Ensures a global approach focused on customer satisfaction and continuous improvement.
- Builds customer trust based on the company's ability to consistently deliver the agreed products and/or services.
- Facilitates the opening of new markets both nationally and internationally.
- Improves our competitive position.
- Increases productivity as a result of continuous improvements in our internal processes. Improvement of our internal organization, achieved through more fluid communications, with set responsibilities and objectives.
- Orientation towards continuous improvement which allows us to identify new opportunities to improve the objectives we have already achieved.
- Increased responsiveness and flexibility to changing market opportunities.
- Increased ability to create value, both for the company and for its suppliers and strategic partners.
- Improvement of the motivation of the staff within our organization, as well as their willingness to work as part of a team.

RoHS

- Ensures that our devices do not contain hazardous substances such as lead, mercury, cadmium, chromium, PBB or PBDE.
- Ensures that our products are environmentally friendly and safe for people's health.

CE

The CE mark is a key indicator of a product's compliance with EU legislation and allows the free movement of products within the European market.

- It guarantees that our products meet all the legal requirements demanded in the European Community and ensures their validity for sale throughout the European Economic Area.
