SANITARY WARE SPECIFICATION SHEET

Item Descriptions	Stern (Israel) "Swan 1000" Chrome plated deck mounted sensor mixer with adjustable temperature limiter in AC Supply with 5m wire AC 110-240 Vac 50/60Hz to 9V 0.3A IP68 waterproof switching transformers	Illustration/ Drawing																																																						
Dimensions	L167 x W66 x H105 mm																																																							
Model	Swan 1000 E AB 1953																																																							
Code Number	252420																																																							
Finish	Chrome Plated																																																							
Supplier	Acme Sanitary Ware Co. Ltd Mr. Eric Wong/ Mr. Don Yuen

SWAN 1000 E AB 1953 Ref # 252420 Touch-free electronic faucet for deck-mounted installations. Activated by an infrared sensor. Solid brass one-piece construction. For hot and cold water, includes a mixer for water temperature adjustment. Filters included. Includes a low battery indicator. Latching solenoid valve is located above deck inside the product for added vandal protection. Solid brass one-piece construction. Adjustable settings by remote control: sensor range, security time, delay in, delay out, on-off and reset to factory settings.																																																								
Application: Deck-mounted faucet. Combining an elegant design with anti-vandal features. Easy installation. Long lasting even in the harshest installation sites. Helps washrooms stay clean and saves water. Prevents cross contamination. Ideal for stadium, train and bus stations and highway rest stops.																																																								
Use: Touch-free electronic faucet. The faucet is automatically activated when users place their hands in the sensor range and stops when the users remove their hands.

- Installation:**
Lavatory mounted
- Water supply:**
Hot & Cold (2 inlets)
- Water temperature:**
Max 70 °C
- Operating pressure:**
0.5 - 8.0 bar
- Power source:**
9V transformer
- Stern Soap & Water:**
Swan Soap dispenser

SPARE PARTS LIST

Quantity	Part Number	Description	Cat. No.
-	-	Seals and Screws Kit	07210029
1	3	O-ring	
1	4	Gasket	
1	19	O-ring	
2	23	O-ring	
1	22	O-ring	
1	18	Screw	
-	-	Sensor Kit	07220190
1	2	Infra Red Sensor	
1	19	O-ring	
-	9	Filter	08530014
-	-	Solenoid valve kit	07230002
1	7	Solenoid valve	
1	20	Diaphragm	
-	20	Diaphragm	04500001
-	-	Insert Kit	07240003
1	21	Insert	
1	22	O-ring	
1	3	Seal	
1	4	Gasket	
1	5	Disk	
1	6	Hexagonal nut	
1	25	Mixer	
1	26	Mixer's nut	
1	23	O-ring	
-	-	Mixer Kit	07250002
1	25	Mixer	
1	26	Mixer's nut	
1	23	O-ring	
-	-	Mixer Handle Kit	07260000
1	15	Override handle	
1	14	Screw	
1	16	Screw	
1	17	Shaft for mixer	
1	23	O-Ring	
1	24	Transformer	TBC

Note: In order to locate the relevant spare part, please check the corresponding parts and part number in the drawing. Minimum order quantity will be required.

FAUCET INSTALLATION

STEP 1 – PREPARATION FOR MOUNTING THE FAUCET

1

Shut off the water supply.

2

Remove the hexagonal nut, the disk and the gasket. Do not remove the O-ring from the base of the faucet.

STEP 2 – INSTALLING THE FAUCET

1

Place the faucet with O-ring into the hole in deck or lavatory. Make sure the O-ring is located between the deck or lavatory and the bottom of the faucet.

2

Below the deck, slide the gasket, disk and hexagonal nut over the flexible hose and secure the faucet into place.

FAUCET INSTALLATION

STEP 3 – CONNECTING THE WATER SUPPLY

1

Connect the flexible pipe to the water supply.

For models with temperature control connect the red flexible pipe to the hot water supply and the blue flexible pipe to the cold water supply.

Make sure the filter (s) is installed between the flexible hose (s) and the shut off valve (angle valve - not supplied).

2 INLETS VERSION

1 INLET VERSION

2

Turn on the central water supply and the shut-off valves (angle valves) and check for leaks.

STEP 4 – CONNECTING THE POWER SOURCE

If your model is Swan 1010 \ Swan 1000: your product contains an internally mounted 9V battery. To activate it, proceed to clause # 2.

1

If your model is Swan 1010 B \ Swan 1000 B: install the battery box underneath the sink with the cable connection pointing down and connect the connectors.

If your model is Swan 1010 E \ Swan 1000 E: Plug the transformer into the electricity socket and connect the connectors.

stern

FAUCET INSTALLATION

2

Remove the protective sticker from the sensor

3

Wait a few seconds before activating the faucet. If the range is unsatisfactory, refer to the section titled "Settings adjustment".

**ABOUT
15
SECONDS**

TROUBLESHOOTING

PROBLEM	INDICATOR	CAUSE	SOLUTION
No water coming out of the faucet:	1. Sensor flashes continuously when user's hands are within the sensor's range.	Low battery.	Replace battery
	2. LED in the sensor does not flash once when user's hands are within the sensor's range.	1. Range is too short.	Increase the range
		2. Range is too long.	Decrease the range
		3. Battery is completely used up	The battery must be replaced.
		4. Unit is in "Security Mode"*	
	3. LED in the sensor flashes once when user's hands are within the sensor's range.	5. Sensor is picking up reflections from the washbasin or another object.	Eliminate cause of reflection.
		1. Connectors between the electronic unit and solenoid are disconnected.	Connect the electronic unit connectors to the solenoid.
		2. Debris or scale in solenoid.	Unscrew solenoid, pull out the plunger and the spring from the solenoid and clean them. Use scale remover material if needed. When replacing the plunger, please make sure that the spring is in vertical position.
		3. The central orifice in the diaphragm is plugged or the diaphragm is torn	Clean the orifice or replace diaphragm.
		4. The water supply pressure is higher than 8 bar.	Reduce the supply water pressure.
		5. The water supply pressure is under 8 bars and yet the pressure in the faucet's body is higher. This situation could be caused by a sudden increase in the water supply pressure that the back check prevents from dropping, even after water supply pressure drops under 8 bars.	Shut off water supply and unscrew one of the flexible pipes in order to reduce the pressure that blocks the product.
Water flow from spout does not stop:	1. Sensor flashes once when user's hands are within the sensor's range.	Debris or scale in diaphragm	Clean the orifice or replace diaphragm.
	2. LED in the sensor does not flash once when user's hands are within the sensor's range.	1. Sensor is dirty or covered.**	Clean or eliminate cause of interference.
		2. Sensor is picking up reflections from the washbasin or another object.	Decrease the range or eliminate cause of reflection.
Water flow diminished		Filter or aerator is clogged	Remove, clean, re-install

* "Security Mode": If the sensor is covered for more than 90 sec. the faucet will automatically shut off water flow. To return to normal operation remove any blockage.

** In this case, the water flow will stop anyway after 90 seconds because of the security time.
