SANITARY WARE SPECIFICATION SHEET

THE REMOTE APP PRODUCTS WITH BLUETOOTH® COMMUNICATION

Selected GROHE products (230V) with Bluetooth® communication* boast a special feature: They can communicate with smartphones and tablets over a free downloadable app, making it easier than ever to read out consumption data and set a variety of functions.

In sanitary facilities with several mixers or WC / urinal flushes, the data from all infrared products within range are captured at once and can be read out one after the other. What's more, the draw-off points can be assigned names via the app, making maintenance more systematic.
