NOBILIS®
RUBINETTERIE

CARLO NOBILI'S CUTTING EDGE TECHNOLOGY MEETS THE MOST
ADVANCED HYGIENIC SAFETY, FOR AN EXTRAORDINARY RESULT

IS THE TREATMENT EFFECTIVE?

Very: the Biomaster treatment hinders the proliferation of bacteria by up to 99.99%. It is an advanced technology based on silver ions, whose effectiveness has been recognized by advanced scientific studies.

IS THE RESULT CERTIFIED?

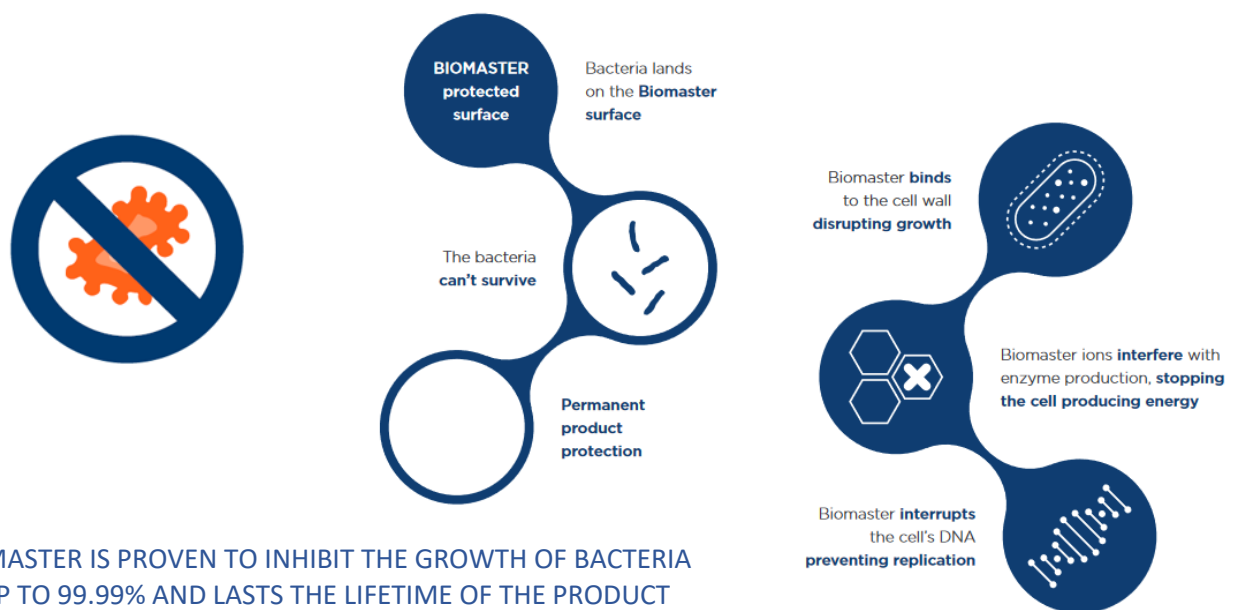

Yes, we performed some tests at the 3A LABORATORI S.r.l. laboratory in Padua. The tests were carried out in compliance with the ISO 22196:2011 technical standard and showed a very high percentage of bacterial activity reduction (Staphylococcus aureus: 99.87% / Escherichia coli: 99.99%).

HOW TRUE ARE THESE TESTS?

The trueness of the test results is attested by the fact that 3A LABORATORI S.r.l. is ACCREDIA accredited (registration number: 1165). ACCREDIA is the sole Italian Accreditation Body and is part of the ILAC-MRA international circuit. The world's major certification bodies are ILAC-MRA signatories and mutually recognise the tests carried out under the accreditation regime.

FOR HOW LONG IS THE TREATMENT EFFECTIVE?

The treatment is considered effective for the entire life cycle of the mixer, it has passed neutral salt spray tests (200 h) and has no harmful effects. The surface finish is not altered in terms of aesthetics, nor does it smell different from the standard.

BIOMASTER IS PROVEN TO INHIBIT THE GROWTH OF BACTERIA
BY UP TO 99.99% AND LASTS THE LIFETIME OF THE PRODUCT

WHAT IS BIOMASTER?

Biomaster is a silver ion antimicrobial powder for the control of microbial growth on transparent substrates that does not alter colour or opacity. The inorganic nature, small particle size and resistance to high temperatures of this additive make it ideal for use in a wide range of applications.

HOW DOES BIOMASTER WORK?

The Biomaster antimicrobial agent is based on silver ion technology and has three modes of action. When bacteria come into contact with a Biomaster protected surface, the silver ions prevent bacterial growth, energy production and propagation, causing them to die. The protection of Biomaster is incredibly durable, long-lasting and highly active. When added, it disperses throughout the mass and becomes an integral part of the product. Silver is inorganic and, unlike organic antimicrobial technologies, remains inside the treated element it is added to. The active ingredient therefore provides maximum antibacterial protection throughout the useful life of the treated product.

**Approval of "NOBILI" Sink Mixer
(General Acceptance No. C20220896)**

Your letters both ref. KHL-Let-20220810-LV00117XX dated 12 August 2022 and 1 September 2022 refer.

Having considered the test report ref. 202299PC200098A issued on 26 July 2022 by Fugro Technical Services Limited and WRAS certificate, this Authority accepts that the fitting described below complies with, and its use when correctly installed does not contravene, the Waterworks Ordinance and Regulations.

Name of Manufacturer: Carlo Nobili SpA Rubinetterie
Country of Origin: Italy
Brand: Nobili
Details of Fitting: 3/8" Single lever sink mixer with 1 no. of flexible hose approved by UK's WRAS under ref. 2107803
Model: LV00117XX
(where "XX" denotes the code of colour and finishes)
Body Markings: **NOBILI** 

Expiry Date: 2 August 2025

This Authority hereby permits the use of the above fitting in fresh water plumbing systems subject to full adherence to Waterworks installation requirements. In particular, you are required to draw your customers' attention to the following requirement-

"The cold water supply to the fitting shall be drawn from the same source that supplies the hot water apparatus so as to provide a balanced pressure and to obviate the risk of scalding in the event of a restriction or failure in the water supply."

A condition of this acceptance is that the fitting to be installed shall be replicas of the sample as certified by the testing agent mentioned above and without modifications. This acceptance may be withdrawn at any time if the standard of the fitting installed fails to meet that of the approved sample or if the fitting is found to be unsuitable for use in fresh water plumbing systems.

This acceptance is only applicable to the main body of the fitting, unless otherwise specified.

For the use of the fitting in any project, the General Acceptance Number of this letter must be quoted as a means of identification of acceptance of the fitting by this Authority.

Should you have any enquiries, please contact our Engineer Ms Winnie LO at tel. no. 3583 4086.

Yours faithfully,

(YAU Hau Yin)

for Director of Water Supplies
