NOBILIS®

The Best Technology for Water

NOBILI

SAVE AND RESPECT THE ENVIRONMENT

Extremely sensitive to protecting the environment: why not join us in the environmentally friendly world. Our mixers possess innovative technologies aimed at water efficiency (a brake system on the cartridge limits flow and helps save water) as well as energy efficiency: when the lever is in the central position, the mixer outputs cold water only, thus avoiding boiler start-up, signifying a substantial saving in energy and reduced consumption of hot water.

FEATURES & TECHNOLOGY

● Chrome / CR ● Velvet Black / BM

General Acceptance (GA)
Water supply pipes and fittings approval issued by The Water Supplies Department.

Hot & Cold Water
Faucets have hot and cold water options.

WELS Grade 1
Showing the level of water consumption and water efficiency of the plumbing fixtures and water-consuming devices.

WELS Grade 2
Showing the level of water consumption and water efficiency of the plumbing fixtures and water-consuming devices.

50% Two Step Cartridge
Position of water saving 50% capacity and 100% Full open flow.

360° Swivel Spout
This tap is perfect for use in multi bowl sink setups or to simply swivel the spout out of the way when not in use.

Pull-Out Spout
Offer lots more flexibility for using water at the sink.

Antibacterial Biomaster Protected
The Biomaster treatment hinders the proliferation of bacteria by up to 99.99%.

THE HEART OF NOBILI MIXER

The Nobili mixer has its own technological jewel, the only one of its kind in the world: the extraordinary Nobili Water Immersion cartridge, designed and produced entirely in our own factories, it more than satisfies eco-sustainable objectives and helps save energy and water on a daily basis. Its design specification and the top quality materials used guarantee maximum comfort and unequalled reliability.
